NetPAS Superior Support

NetPAS Inc., Support Solutions exemplify how we are the leading information technology management company in the Central Valley. We understand that companies have different needs throughout their growth cycles. Smaller companies may need a complete solution for their single location. Where as larger companies may need different solutions for each location. NetPAS is here to provide your organization with the service and support you need, at the time and place you need it.

Local Tech Support

NetPAS engineers are ready to provide your organization real time trouble-shooting and repairs that keep things running smoothly. Handling hardware and software needs as they come up. This includes those nasty software compatibility issues.

Equipment Leasing

Leasing is a cost-effective way for your business to stay current, without reducing working capital. Increase your staff efficiency and utilize tax benefits with easy monthly payments. Digital equipment has a 36 month productivity cycle, after which, productivity only decreases with time.

NetPAS Superior Services

Network Management

NetPAS maintains an intensive, interactive and thorough system of monitoring, response and follow-up, providing you peace of mind. We know computer suppliers and can keep you informed on licensing issues that may impact your organization. Let us help you plan your growth and relocation, to help eliminate future technology problems.

Disaster Recovery

How would your business handle a fire, earthquake or theft that destroyed the companies computer systems? Call NetPAS to find out how off site backup could save your data and make recovery possible.

Maintenance & Repair

NetPAS has a full-service facility with certified technicians that can handle any of your maintenance & repair requirements. With our integrated hardware and software approach you will be made aware of any issues that may arise in your organization.

Professional Web Services

NetPAS can help your company with its E-commerce appearance. We can offer you the professional design experience that keeps your company looking as professional as it should. We can even provide you with email and domain name registration.

High Speed Internet

NetPAS offers a variety of high speed internet solutions that are faster, more reliable and have greater capacity than traditional DSL or T-1 services. Call today for your competitive quote to see which solution best fits your need.
